

89.5 (Air 1) is a great radio station...I used to hate listening to music on the radio, until I found Air 1 by accident...If it were to be replaced by LPFM, I would again hate the radio, and always put in a cd instead...Air 1 helps people to relax because it has no loud, annoying advertisements that fill up extra time slots when music could be played. And it also plays current Christian music...when other stations don't. Please don't get rid of our usual FM broadcasting, thousands of people would be very dissapointed, just like me...it makes me sad just to think of it. Thanks.
